Ultimate Performance Glass

ULTIMATE PERFORMANCE GLASS

 **Cardinal Coated Glass**

Superior glass products
for residential windows and doors

A young child with dark hair and eyes is smiling and looking out a window. The background is a bright, slightly blurred outdoor scene. A large, stylized number '3' is overlaid on the right side of the image, with a white outline and a light blue fill. The text 'Introducing the new standard.' is positioned over the top part of the image, with 'Introducing the new' in black and 'standard.' in white.

Introducing the new standard.

Introducing LoE³-366 (pronounced low E cubed-366), the ultimate performance glass. It just might make all other low-e glass obsolete. LoE³-366 delivers the ideal balance of solar control and high visibility. And it provides the highest levels of year-round comfort and energy savings, making it the perfect glass no matter where you live. The secret? An unprecedented **3** layers of **silver**. For your next windows, go beyond ordinary low-e glass. Choose LoE³-366, the new standard.

Beats the heat. Keeps the view.

When the temperature soars, ordinary window glass just can't handle the heat. And tinted glass spoils the view. Cardinal LoE³-366, however, has been specially formulated to reject the sun's heat without affecting the view. It lets more light in and keeps more heat out. So your home stays cool and comfortable. Our patented LoE³-366 coating provides the ultimate in performance and clarity of all our LoE products.

What's more, LoE³-366 provides exceptional fading protection as well. It blocks 95% of the sun's damaging ultraviolet rays (a leading cause of fading), so it will help your furniture, carpets, curtains and wall coverings stay beautiful for years to come.

90° outside

75° inside

Cardinal LoE³-366 reduces window heat gain by 64% compared to ordinary glass.
