**SAFETY, SECURITY AND
ENERGY EFFICIENCY...**

The WindPact Plus® Series from Custom Window Systems not only fits better and looks better, it also performs better.

Custom Window Systems, Inc. has been manufacturing high quality windows and doors in Ocala, Florida since 1986. Our WindPact Plus® product line is specifically designed for the hurricane impact zones in Florida and other coastal markets. Our 225,000 square feet of modern manufacturing ensures that we achieve superior levels of impact resistance, safety and security.

Throughout that time we have been proudly innovating and introducing products that meet or exceed the most stringent coastal requirements, including full High Velocity Hurricane Zone (HVHZ) ratings. The WindPact Plus Series is an example of our innovation. We build in all of the newest advances in engineering and technology while never compromising on quality. This ensures that the WindPact Plus® Series from Custom Window Systems not only fits better and looks better, it also performs better.
