

Tough Products For A Tough Climate

Therma-Tru®: The Best Door Systems For Florida

Therma-Tru works with dealers, builders and remodelers like you every day. It's what makes us the definitive brand of entry and patio door systems for the rigorous demands of the Florida climate. The same unbeatable know-how, quality and dependability is in every product Therma-Tru makes.

You have unique building needs. Therma-Tru has the best solutions.

The Most Preferred Brand in the Business™

THERMA-TRU®
DOORS

Unpredictable Weather Calls For Dependable Performance

In response to the specific needs of Florida, Therma-Tru® offers doors that are engineered to offer enhanced protection against weather changes and the damaging conditions they can bring. It's our way of helping to provide peace of mind to builders and homeowners throughout the region.

Thru-N-Tru™ Door Technology: Protection To The Core

Therma-Tru Smooth-Star® and Fiber-Classic® entry & patio doors, manufactured with the Thru-N-Tru (TNT) process, are protected through and through with a special technology. The door stays solid, straight and true – the way it was built!

- 1 Molded Fiberglass Skin**
Outperforms wood or steel: no cracking, rotting, dents or rust
- 2 Preserved Wood Stiles & Lock Block**
Dimensionally stable, engineered solution is resistant to rot, mold, water absorption and wood-ingesting insects
- 3 Polyurethane Core**
*Solid doors offer up to four times the insulating value of most wood doors**
- 4 Composite Top & Bottom Rails**
Deliver durable, long-lasting performance

PUR Adhesive: Exterior grade, waterproof adhesive (like a high-strength, industrial version of Gorilla Glue®) promotes resistance to thermal deflection, increases door stiffness and improves structural integrity

- Every part of the door is rot-resistant, inside and out
- 100% through and through treatment helps protect all machined areas
- Dimensionally stable – warranted to not delaminate due to swelling**
- Machines and trims using standard woodworking tools
- Optimal screw retention
- Versatile yet durable – optimal solution for door shops, builders and remodelers
- Can be finished to complement any style
- Enhanced warranty protection with labor allowance for Florida residential installations after January 1, 2007**

*Comparison of fiberglass to wood doors (both without glass)

**See our limited lifetime warranty at www.thermatru.com and our TNT Technology Florida Rider, available from Therma-Tru, for all terms.
